

JOSHUA SILVA

Game Designer | Gameplay Programmer | Unreal Engine 5 Specialist

📞 (346) 588-6840 | ✉ joshua.silva8@icloud.com | 🔗 [LinkedIn](#) | 📁 [Portfolio](#)

PROFESSIONAL SUMMARY

Creative and technically proficient Game Designer with hands-on programming experience in Unreal Engine 5. Skilled in gameplay systems design, rapid prototyping, and cross-disciplinary collaboration. Proven ability to translate creative vision into polished interactive experiences through Blueprint scripting, C++ implementation, and iterative playtesting.

TECHNICAL SKILLS

Programming & Engines:	Unreal Engine 5, Unity, C++, Blueprint Visual Scripting
Design Expertise:	Gameplay Systems, Level Design, Mechanics Design, Combat Systems, Player Experience
Development Tools:	Perforce, Git, Jira, Confluence, Visual Studio, Trello, 3DS Max, PureRef
Core Competencies:	Rapid Prototyping, Performance Optimization, UI/UX Design, QA & Testing, Technical Documentation

PROFESSIONAL EXPERIENCE

Gameplay Programmer Intern | T'sarE LLC

June 2025 – Present

- Developed and optimized Blueprint gameplay systems in Unreal Engine 5, including dynamic material instances responsive to speed variables
- Engineered zone transition system with context-specific loading screens for seamless level flow
- Collaborated with programmers and designers to implement gameplay features and optimize performance

PROJECT EXPERIENCE

Shadowborne

Gameplay Designer/Programmer & QA Lead | Oct 2024 – Feb 2025

- Designed immersive level layouts emphasizing environmental storytelling, pacing, and player engagement
- Implemented responsive UI/UX healing systems and precision-timed combat mechanics using Blueprint and C++
- Developed adaptive enemy AI systems and led QA documentation through Jira for cross-team coordination

FPS Team Project

Gameplay/Mechanic Designer | Apr 2024 – May 2024

- Collaborated in agile team to design and develop first-person shooter experience in Unreal Engine 5
- Programmed modular weapon system and dual-resource UI providing real-time combat feedback
- Integrated Niagara-based environmental hazards to increase level interactivity and player engagement

Adventure Level Design

Level Designer/Gameplay Programmer | Sep 2023 – Oct 2023

- Designed gate and valve puzzle systems optimizing player progression, flow, and navigation clarity
- Implemented Blueprint-based mechanics using environmental storytelling, landmarks, and leading lines
- Utilized Perforce source control for team collaboration and seamless asset integration

Stack O Bot

Mechanic Designer/Programmer | 2023

- Designed core gameplay mechanics and implemented them using Blueprint visual scripting
- Developed physics-based interactions and refined control schemes through rapid prototyping
- Balanced difficulty progression through data-driven playtesting and analysis

EDUCATION

Bachelor of Science in Game Design | Full Sail University, Winter Park, FL

Feb 2025

Focus: Gameplay Systems, Level Design, Unreal Engine Development

KEY STRENGTHS

Design & Implementation: Creative problem-solver translating concepts into engaging experiences	Technical Proficiency: Skilled in Blueprint and C++ for rapid prototyping and system development
Collaboration: Strong communicator across art, programming, and production disciplines	Player-Focused: Design and code decisions informed by playtesting and player psychology
